Edexcel GCE

Core Mathematics C1 Advanced Subsidiary

Monday 24 May 2010 – Afternoon

Materials required for examination

Mathematical Formulae (Pink)

Time: 1 hour 30 minutes

Items included with question papers

Calculators may NOT be used in this examination.

Instructions to Candidates

In the boxes above, write your centre number, candidate number, your surname, initials and signature. Check that you have the correct question paper.

Answer ALL the questions.

You must write your answer to each question in the space following the question.

Information for Candidates

A booklet 'Mathematical Formulae and Statistical Tables' is provided.

Full marks may be obtained for answers to ALL questions.

The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2).

There are 11 questions in this question paper. The total mark for this paper is 75.

There are 28 pages in this question paper. Any blank pages are indicated.

Advice to Candidates

You must ensure that your answers to parts of questions are clearly labelled. You should show sufficient working to make your methods clear to the Examiner. Answers without working may not gain full credit.

This publication may be reproduced only in accordance with Edexcel Limited copyright policy. ©2010 Edexcel Limited.

Figure 1

Figure 1 shows a sketch of the curve with equation y = f(x). The curve has a maximum point A at (-2, 3) and a minimum point B at (3, -5).

On separate diagrams sketch the curve with equation

(a)
$$y = f(x+3)$$
 (3)

(b)
$$y = 2f(x)$$
 (3)

On each diagram show clearly the coordinates of the maximum and minimum points.

The graph of y = f(x) + a has a minimum at (3, 0), where a is a constant.

(c) Write down the value of a.

- 10. (a) On the axes below sketch the graphs of
 - (i) y = x(4-x)
 - (ii) $y = x^2(7-x)$

showing clearly the coordinates of the points where the curves cross the coordinate axes.

(5)

(b) Show that the x-coordinates of the points of intersection of

$$y = x(4-x)$$
 and $y = x^2(7-x)$

are given by the solutions to the equation $x(x^2 - 8x + 4) = 0$

(3)

The point A lies on both of the curves and the x and y coordinates of A are both positive.

(c) Find the exact coordinates of A, leaving your answer in the form $(p+q\sqrt{3}, r+s\sqrt{3})$, where p, q, r and s are integers.
